The plywood is a semi-finished wood, made of veneer sheets superimposed perpendicularly sheet by sheet, glued under pressure. With a wide specification, plywood has a wide range of uses, such as furniture, packaging, interior design, construction, etc.

Product description

Technical details
Standard format: 1525 x 1525 mm; 2500 x 1250 mm
Thickness: 4 - 21 mm
Face quality: B; CP; C
Gluing type: indoor / outdoor
Adhesive: E1
Polished / unpolished

Technical values

Bending strength (MPa)	55
Tensile strength (MPa)	30
Moisture content (%)	5-10
Formaldehyde content (mg / 100mg)	≤ 10 (E1)

Dimensions and tolerances

Dimension	Tolerance
Length and width (mm)	±4
Thickness (mm)	+0.3/-0,9
