

Poplar plywood is a semi-finished wood in the shape of a plate of different sizes, made by gluing under high pressure a number of superimposed poplar veneer sheets, used in the manufacture of furniture, packaging, boats, toys, construction, automotive industry etc. It has a wide range of uses and is widely used.

Product description

Technical details

Standard format 2440 x 1220 mm; 2500 x 1250 mm
 Thickness: 4 - 21 mm
 Face quality: B; CP; C
 Gluing type: indoor / outdoor
 Adhesive: E1

Dimensions and tolerances

Tolerance	Min / max value
Length and width (mm)	± 4 mm
Thickness (mm)	+ 0,3 / - 0,9

Technical values

Characteristic	Value
Bending strength (MPa)	55
Tensile strength (MPa)	30
Moisture content (%)	5 - 10
Formaldehyde content (mg / 100g)	≤ 10 (E1)

Example of use
